Intertek **CFDI** Certified Fire & Egress Door Inspector Program

Certified Fire & Egress
Door Inspector Program

Intertek

The most recent editions of NFPA 80-2007 and NFPA 101-2009 require documented, annual inspections of fire or egress rated door assemblies performed by individuals who are knowledgeable of the types of door assemblies being inspected. Through Intertek's **Intertek CFDI** *Certified Fire and Egress Door Inspector Program*, inspectors will be certified to properly perform these annual inspections.

As part of the program, a **Intertek CFDI** *Certified Fire and Egress Door Inspector* will apply a program specific inspection label to each fire or egress rated assembly after the inspection. This label provides visual evidence that the inspection was conducted by a *Certified Inspector* and states the year of the inspection. Additionally, the **Intertek CFDI** *Certified Fire and Egress Door Inspector* creates an FDAI specific documentation inspection log of compliant and noncompliant openings, which will be available to the buildings' owners as their official record of inspection.

For more than 100 years Intertek has served as the testing, inspection and certification leader for building products and materials. Intertek's Warnock Hersey Mark has long been the industry preferred certification mark.

How do I become a Certified Fire and Egress Door Inspector?

An individual is eligible to register with Intertek upon successful completion of the Door and Hardware Institute's (DHI) annual Fire Door Assembly Inspection (FDAI) program and examination, which includes:

- DHI's Fire and Egress Door Assembly Inspection class (DAI 600)
- Intertek's  *Certified Fire and Egress Door Inspector* registration

However, one is not eligible to become a  *Certified Fire and Egress Door Inspector* until affiliated with an "Applicant Company" that has completed the registration process with Intertek. At that time, the following will be issued:

- An ID badge with the  *Certified Fire and Egress Door Inspector's* photo and pertinent information
- A certificate for each Applicant Company with  *Certified Fire and Egress Door Inspectors* on staff

A  *Certified Fire and Egress Door Inspector's* badge is valid for three years, at which time a re-certification class will be required by Intertek. The intent of additional DHI training (for re-certification) is to bring your knowledge base up-to-date with any changes in standards and processes.

What are the advantages?

This program allows you to be proactive and ensure that fire or egress door assembly inspections are completed on a timely basis, are convenient to your schedule, and that they offer a cost effective solution.

Companies offering annual fire and egress door inspection services should utilize Intertek *Certified Inspectors* to assure confidence in building owners, insurance carriers and the Authorities Having Jurisdiction (AHJ).

- Increased public safety through proactive annual reviews
- Save time and reduce liability for property managers and building owners
- Receive acceptance and recognition by AHJs because of their confidence in Intertek and our labeling service programs
- Provide the annual inspection services required by NFPA 80-2007 and NFPA 101-2009, which require documented annual inspections of fire or egress rated door assemblies

What are the related certification costs?

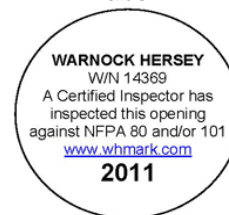

Each Applicant Company will be audited annually by Intertek at the address provided during registration. Additionally, audits will be performed on individual  *Certified Fire and Egress Door Inspectors*.

- Annual registration cost for the Applicant Company: \$1,100 (\$50/month/location plus a semi-annual service fee of \$250) (Includes audits, SpecDirect™ online directory, file maintenance)
- Annual individual  *Certified Fire and Egress Door Inspector* cost: Annual fee of \$100 for each individual at the company location

Each Applicant Company will order inspection labels online, directly from Intertek.

- Inspection label: Non-refundable fee of 10¢ each; minimum order 1000 (actual size of label shown):
